

Fraud Review Policy

NorthStar Commerce — Customer Operations | POL-CX-003 | Effective Jan 2026 | Owner: CX Policy Team

1. FRAUD-REVIEW — Mandatory Human Escalation

Certain claims carry elevated abuse risk and must be escalated to a human agent for fraud review before any refund or replacement is approved. Automated or agent-initiated resolution is not permitted until review is complete.

2. Escalation Triggers

A claim must be escalated for fraud review if any of the following conditions are met: the order value is above \$150; the customer has three or more prior refund claims; or the account is younger than 30 days.

3. Review Procedure

During review, agents verify delivery details and signature data, compare the shipping address against the account address history, and check payment-method and chargeback signals. The outcome of every review is recorded for future pattern analysis.
